

TCR Asia Bulletin No. 18/19

Zhejiang International Circuit, China
5 – 7 July 2019

With inquiries made during the driver's briefing, please find additional information, for your guidance:

1. Start Grid Boxes:

As the cars take up their start grid positions, there will be marshals who will be positioned at opposite sides of the track with a grid number board. This is to guide drivers into their grid positions. Please note that the board will indicate the grid number, not the car number. Finally, in lining up to your grid box, it will be outer box that is to be used (both for left and right side).

2. Safety Car Lights "Off" Location:

When the race is ready to be resumed and the Race Director calls in the Safety Car, its flashing lights will be turned off after the Safety Car exits Turn 9.

3. Tire Cluster on Turn 3:

Please be advised that the existing tire cluster on the apex of turn 3 will be used for both races.

DAVID SONENSCHER
Series Director
